

# HOSPITAL CASE MANAGEMENT™

The monthly update on hospital-based care planning

## 2010 Index

### *Access Management*

Audit your MSP data,  
NOV:174  
Cell phone pix: A new diagnostic tool?, DEC:190  
Dually employed CM is new trend, NOV:172  
Estimate costly gaps in authorization, AUG: 126  
Get bad debt under control, AUG:124  
Involve clinicians in egress plans, DEC:190  
Nurses, patients like new approach, DEC:191  
Strategies for assuring a clean claim, FEB: 29  
Trace denials to provider office, NOV: 174  
Where do EDs remain challenged, DEC:188

### *Admission Status*

Ensure status is correct up front, APR:49  
FAQ on Condition Code 44, APR:52

### *Ambulatory Care*

Avoid risk by documenting ED efforts, JUN:93  
Cardiac MRI in obs cuts admissions, NOV:170  
ED collaborates with other departments, JUN:95  
ED greeter streamlines triage, JUN:92  
ED patients get a bed in three minutes, JUN:92

Is boarded care substandard?  
SEP:142  
Rapid evaluation unit cuts ED waits, MAR:46  
Reducing ED patients who leave without treatment, JUN:94  
Technologies to cut costs, improve service, MAY:78  
Use technology to assure collections, MAY:77

### *Career Issues*

Salaries, hours on the rise, JAN: insert  
Healthcare Reform means bigger CM role, JUN:81

### *Case management models*

CMs, SWs take traditional roles, DEC:182  
Model promotes interdisciplinary communication, NOV:166  
Redesign reduces LOS, FEB:23  
Triad model improves patient flow, FEB:25

### *CMS Audits*

Being prepared is best defense: DEC:177  
Innovative thinking helps prepare for RACS, FEB:27  
MIC auditors look at Medicaid claims, JAN:1  
Prepare for audits from all payers, JAN:4  
Use PEPPER to identify areas to focus, DEC:181

ZPICs targeting short stays, MAR:33

### *Compliance Issues*

Document fully when issuing HINNs, JAN:5  
IPPS focuses on accurate documentation, JUL:101  
Prepare now for ICD-10, JUL:102

### *Discharge Planning*

Fewer discharge options for pediatric patients, JAN: 15  
Hospital, medical home staff facilitate discharge, AUG:137  
Joint initiative reduce discharge delays, JUL:103  
Plan discharge to rehab early in the stay, APR:60  
Start discharge planning in ED, OCT:153

### *Elder Care*

Education for staff on caring for seniors, DEC:183  
ED dedicated to patients 65+ JUN:88  
Listen to patients on plan of care, DEC: 184  
Project targets costs for Medicare beneficiaries, SEP:135  
With elders, be cautious with fluid resuscitation, DEC:185

### *End-of-Life Issues*

Palliative Care team aids throughput, OCT:150

Study touts reimbursement for discussions, JAN:13

### **Medicare Issues**

IPPS means do more with less, OCT:145

Outpatient data on CMS website, SEP:139

### **Patient Flow**

CM redesign among initiatives, AUG:119

Collaborating on capacity management, SEP:140

Communication helps improve patient throughput, JUL:100

Disease management reduces hospital stays MAR:41

Focus on appropriate levels of care, APR:55

Glycemic control cuts length of stay, OCT:156

ICU, ED throughput dovetail, JUL:105

Initiatives raises hospital capacity, AUG:117

Hospital-wide team works on LOS, Jan:9

Move patients quickly through continuum, JUL:97

New department focuses on throughput, OCT:148

Simple tool speeds discharge, JAN:10

### **Patient Safety**

Nurses oversee radiological discrepancies, APR:63

Report safety lapses in your hospital, JUN:84

### **Preventing Readmissions**

Be proactive to avoid penalties from CMS, FEB:17

Beware of Friday discharges, MAY:73

CHF care coordination across the continuum, OCT:151

CHF program includes extra education, NOV:168

Communicate after discharge, MAR:39

Coordinate services after discharge, MAY:65

Cross-continuum team targets CHF readmissions, MAY:70

Dedicated hospitalist wing improves follow-up care, AUG:121

Ensure patients have follow-up visits, MAY:69

Follow-up calls improve transitions of care, JAN:7

Focus on what happens after discharge, FEB:20

Home care helps with CHF patients, FEB:22

Increased communication with post-acute providers, JUL:107

Make sure patients understand their disease, May:68

Nurses visit high risk patients at home, JUN:87

Project BOOST improves transitions, JUL:110

Variety of programs aim to cut readmissions, SEP:129

Track, trend patients who come back, NOV:167

### **Quality Improvement**

Checklist helps in discharge process, OCT:158

Focus on publicly reported data, AUG:113

Importance of accurate data, AUG:116

Staff drives LEAN process, MAR:46

Stop to listen to patients, NOV:164

Use patient satisfaction data to identify focus, NOV:161

### **Reimbursement Issues**

CMSA promotes CM reimbursement, MAY:74

Hospital appeals majority of RAC denials, JAN:11

Program raises case mix index, MAR:43

### **Transitions in Care**

Coaches for elder CHF patients, APR:57

Hospital partners with LTACH for transplant patients, APR:56

Orientation sessions help families in LTACHs, JUN:85

Planning cuts COPD readmission rates, MAY:71
